Dear Mr. Olson:

Attached is the revision on my patent claims, probably pretty similar to what the final version will be. (I didn't add the reasons for the claim amendments in this FAX.

In the specification on page ____ I added some definitions, including "apparent gravity horizon" I just want to make sure those definitions make sense to you, and I've used them uniformly throughout the patent.

The Amended claim 1 (only for your ease of reviewing my additional changes on it at this time) has strike-outs and underlines **relative to the acceptable claim wording you sent me on September 8**. Most of the changes help clarify things and I removed the braking system and made that dependent claim 2, however, if you considered the brake system as part of the novelty of claim 1, it can go back there.

I did put the September 8 acceptable claim language as new claim # 24.

In the final write up of the claims, in the places where I struck the original first claim and re-wrote it, would you like me to put the strikeout claim first, or the underlined amended version first? However, if you think it would be easier, I can simply cancel all the original claims and add the ones I'm currently submitting as starting at claim 21 onward. That might make it read easier, but not sure if that would be your preference.

Thank you

~~David Grober~~
